*You make a living by what you get.
You make a life by what you give.*
~Winston Churchill

The mission of *Reaching Out Now, Inc.*

Through leadership and empowerment we support and encourage under-served school-aged girls (6th through 12th grade), and young women to live victoriously and not defeated; to reach their full potential. We serve by implementing mentoring and support programs and challenging

students to rise above life's circumstances to become their best selves.

Our Vision

We will challenge those we serve to build a bridge that reaches success and make confident decisions that will set them on a path to a successful future.

Who Do We Serve and Why?

As an organization, Reaching Out Now, has created programs in-line with its mission and the mission of Warren County Public Schools to serve our school system. We will challenge the students we serve to rise above their circumstances and strive to reach their full potential.

Through our programs, we will be a support in the lives of the students where critical voids exist, i.e., loss of finances, low self-esteem, social and emotional challenges, and student academic struggles. Through the programs proposed, the students will become confident, self-sufficient, and prepared as they go through school.

We care for our teachers and recognize that they are influential in the educational development of our children. Partnership with our teachers, our positive reinforcement will cultivate positive attributes for students to succeed in life.
